

Save Energy, Save Money

The Small Business Solutions Program helps small nonprofits and owners of small businesses sustain a competitive position in their field by aiding them in managing and reducing their energy costs. Whether you own a convenience store, serve at a place of worship, or run a small family business, you can reduce your energy costs while enhancing workplace comfort.

The Small Business Solutions Program offers small business customers the opportunity to retrofit existing equipment with more energy-efficient technologies.

Key Features

- **Comprehensive on-site energy analysis** and recommendations to improve your overall efficiency.
- **Up to 80 percent coverage of total cost** for most lighting, smart thermostat, and refrigeration control retrofit projects—plus some related expenses.
- **Approved contractors** make upgrading easy.
- **Equipment installed** at your convenience.
- **Removal and environmentally responsible disposal** of old fluorescent lamps and ballasts.
